CURVED GLASS WINDSHIELD SYSTEM

Designed specifically to accept high-performance curved glass, the Bomar Extruded Aluminum Windshield System combines rugged marine-grade durability with clean, modern aesthetic integration. Built with internal electrical wireways and designed for straightforward bolt-on installation, this system delivers an exceptionally clean finish for luxury center consoles, sportfish, and catamaran builds.

Frame Construction & Finish

Extruded Aluminum Framing:
Precision-engineered heavy-duty extrusions built for harsh offshore marine environments.

Marine-Grade Powder Coat Finish:
Comes standard with Bomar's high-durability, corrosion-resistant marine powder coating.

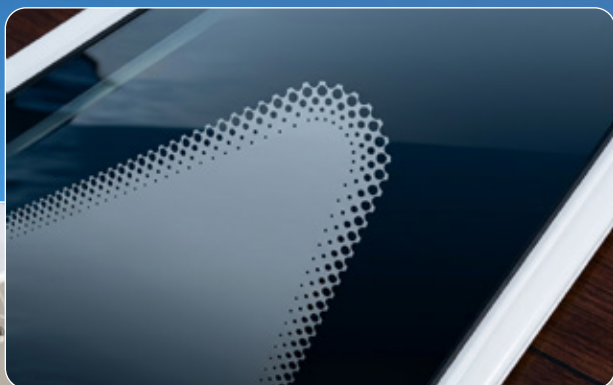

Engineered Electrical Wireways:
Integrated internal channels for concealed routing of wiring to overhead lighting, electronics, or sensors.

Bolt-On Installation: Designed for direct bolt-on fitment, streamlining shipyard assembly and integration.

Glass & Glazing Capabilities

- **Curved Glass Accommodation:** Specially contoured frame designed to accept curved windshield configurations.
- **Advanced Glass Options:** Compatible with Laminated, Tempered, or Chemically Strengthened glass options to meet required impact resistance standards.
- **Solid Frit Border:** Precision black/dark frit printing along the perimeter for optimal UV shielding and clean visual masking.

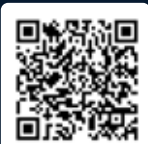

Optional Upgrades & Configurations

- **Electric Top Center Vent (12V / 24V):** Integrated motorized ventilation hatch for effortless airflow control at the helm.
- **Custom Side Panels:** Fully customized side glass and frame profiles tailored to specific vessel lines and hardtop geometry.
- **Integrated Grab Rail Support:** Structural integration designed to mate cleanly with hardtop support legs and helm grab bars.
